SKILLS

JavaScript | Ruby | Rails | React.js | Redux.js | Express | MongoDB | Mongoose | PostgreSQL

PROJECTS

Orcastra | *(React/Redux, Express.js/Node.js, MongoDB/Mongoose, AWS S3)*   **https://orcastra.onrender.com/**
- Spearheaded the development of a full Node backend using an Express framework and MongoDB/Mongoose as the DBMS.
- Created a robust and efficient routing system that defined all the endpoints that the frontend could call to perform various actions or retrieve data from the server.
- Implemented the necessary validations to ensure the data being processed by the server is accurate, complete, and consistent.
- Responsible for creating middleware functions to handle the fetching of the proper data from MongoDB while maintaining a normalized redux state.
- Generated a Mongoose.]s schema to utilize some of the build in methods to optimize the creation of validations on our database.

Discable | *(React/Redux, Rails 7, ActionCable/Websockets, PostgresQL)*   **https://discable-k8cm.onrender.com/**
- Developed an entire lifestyle application with the use of a Ruby on Rails backend, PostgreSQL database, and a React.JS frontend with Redux for global state management.
- Secure login/signup user authentication with the use of the BCrypt gem on Rails.
- Utilized ActionCable and Websockets to implement communication between server and client for live updating features such as messages, friendships, channels, and servers.
- Efficient association between models, such as new Server creations generating a default channel while still maintaining a normalized state with the use of JBuilder.

Riemann Sums | *(Javascript, CSS, HTML)*   **https://camachoo1.github.io/Riemann-Sum/**
- Created an interactive web application that allows users to build their own functions and set intervals to calculate the area under a curve.
- Utilized DesmosAPI to generate graphs and coded the logic for restricting intervals and functions using LaTeX.
- Abstracted restrictor functions from the user by setting default visibility values to ensure seamless user experience.

EXPERIENCE

Astranis
Technical Recruiter   May 2021 - Oct 2022
- Owned and led the full cycle recruitment for the Environmental Test, Assembly Integration, and Test, and Production teams.
- Developed streamlined recruiting processes such as approved scoring criteria for interviews, requirements for key roles, and facilitating meetings to discuss post onsite interviews which resulted in a 75% success ratio across interview stages.
- Facilitated weekly meetings with the team leads and executive team to discuss weekly priorities and progress across each key role and forecasting.
- Identify key job requirements, screen/interview candidates to understand strengths, and aim to match skills, passion, and career interests with specific organizational needs.

Aerotek
Recruiter/Account Manager   Dec 2017 - Apr 2021
- Responsible for growing sales territories for both manufacturing and corporate services industries.
- Conducted meetings with hiring managers to negotiate rates, contracts, salaries, and fully qualify each requisition based on clients needs.
- Provided customer service to clients by visiting the onsite team for weekly and quarterly business results meetings.
- Managed a team of recruiters and aided in their development and training by providing detailed daily, weekly, and quarterly expectations.

EDUCATION

AppAcademy - Four-month hybrid web development bootcamp focused on JavaScript, React, Data Structure and

Algorithms (DS&A), PostgreSQL, Git, and Ruby on Rails, 2022 - 2023

University of California, Irvine - *BA Business Economics, 2012 - 2016*
